Re: Campaign to Promote Broadband Speed Tests

Date: June 10, 2020

High-speed broadband is critical to the growth of the local economy in both community and business development. As we have experienced through the response to the Covid-19 pandemic, internet is more vital now than ever before.

But closing broadband gaps requires data about broadband speeds in homes and businesses throughout Greene County – especially where service is poor. We need your help in promoting awareness and wide participation in this [broadband speed test and survey](#).
