

Rotational Grazing Plans

What is Rotational Grazing?

Rotational Grazing is a grazing management system where livestock are moved periodically between different paddocks, allowing each area to rest and regrow before being grazed again.

Benefits

- ✓ Healthier livestock
- ✓ Feed less hay
- ✓ Increase pasture Yields
- ✓ Improve profit margins
- ✓ Higher quality pastures
- ✓ Carry more animals on the same acreage

Rotational Grazing plans are now available through ACAP funding. Please contact the district to get started!
